Uttara-10, Dhaka, Bangladesh

Summary

Computer Science and Engineering graduate (CGPA 3.79/4.0) with hands-on experience in ISP network support and Tier-1 technical troubleshooting across networks, routers, Wi-Fi, cabling and Windows/Linux systems. Used to diagnosing problems independently and fixing them before escalating. Working knowledge of TCP/IP, LAN, DHCP, DNS and basic cybersecurity through practical labs with Wireshark, Nmap and OpenVAS.

Experience

Network Support Engineer (Intern)

07/2026 – Present

Infolink Limited

Dhaka, Bangladesh

- Provided technical support and network troubleshooting for ISP customers, isolating faults across ONU, router, and core network layers using MikroTik (WinBox) and VSOL OLT platforms.
- Handled client support end-to-end: diagnosed whether issues were ONU-, router-, or ISP-side, resolved them where possible, and created tasks and assigned field technicians only when on-site work was needed.
- Managed IP provisioning, VLAN configuration, and bandwidth queues; located client ONU/MAC via VSOL OLT cross-referenced with MikroTik router data.
- Conducted on-site installations, structured cabling (including RJ45/UTP termination), and customer connectivity setup.
- Monitored network availability, latency, and bandwidth utilization, proactively identifying performance issues and resolving them or escalating with a clear diagnosis.

Technical Skills

IT Support: Tier-1 Technical Support, Wi-Fi & LAN Troubleshooting, Windows & Linux Support, Task/Ticket Handling, Customer Communication

Desktop Support: Windows installation & troubleshooting, MS Office support

Networking: TCP/IP, OSI Model, IPv4 Addressing, Subnetting, VLSM, VLAN, 802.1Q, Inter-VLAN Routing, RIP v2, DHCP, DNS, NAT, VPN, IP Provisioning, Bandwidth Management

ISP & Network Infrastructure: MikroTik RouterOS/WinBox, VSOL EPON OLT, ONU Configuration & MAC Tracing, Bandwidth Queue Management, Structured Cabling

Cybersecurity: Wireshark, Nmap, OpenVAS, Burp Suite, Kali Linux, Network Traffic Analysis, Vulnerability Assessment

Systems & Tools: Windows, Linux (Kali, Ubuntu), VirtualBox, Nagios, Asterisk/PJSIP, Python, Git, Cisco Packet Tracer

Projects

Multi-Router Campus Network Design | *Cisco Packet Tracer, VLAN, VLSM, RIP*

- Designed a three-building campus network using VLANs, VLSM subnetting, and RIP v2 dynamic routing.
- Implemented inter-VLAN routing (router-on-a-stick) with 802.1Q trunking; documented in a full lab report.

Cybersecurity Home Lab | *VirtualBox, Kali Linux, Wireshark, Nmap, OpenVAS*

- Built a virtualized lab with Kali Linux, Metasploitable 2/3, Ubuntu Server, and Windows targets to simulate real-world testing scenarios.
- Performed traffic monitoring and vulnerability scanning using Wireshark, Nmap, and OpenVAS; practiced web security testing with Burp Suite and PicoCTF.

JFP TeleManage – Asterisk-Based IP-PBX System | *Asterisk, PJSIP, Ubuntu Server*

- Building a VoIP/telephony system in Asterisk (PJSIP) for a departmental communication use case modeled on Jamuna Future Park.
- Configured SIP extensions, IVR, call queues, dialplan routing, and SIP trunking in a VirtualBox lab; diagnosed and resolved NAT issues affecting SIP registration.

Education

International University of Business Agriculture and Technology (IUBAT)

Bachelor of Computer Science and Engineering, CGPA: 3.79/4.0

09/2022 – 09/2026

Dhaka, Bangladesh

Uttara Model College

Higher Secondary School Certificate, GPA: 4.92/5.0

2019 – 2021

Dhaka, Bangladesh

Shahid Academic School

Secondary School Certificate, GPA: 4.57/5.0

2017 – 2019

Dhaka, Bangladesh

Certifications & Training

CCNA Training (Running) – AIUB

Advanced Cybersecurity Training – Business Automation Ltd.

Introduction to Cybersecurity – Cisco

Networking Basics – Cisco

Linux 100: Fundamentals – TCM Security

Network Analysis – Security Blue Team
