SUMMARY

Computer Science and Engineering student with hands-on experience in IP addressing, routing, switching, and network troubleshooting. Comfortable using Wireshark and Nmap to diagnose issues and support network performance. Seeking a networking internship to build practical experience in deployment, monitoring, and maintenance.

PROJECTS

Cyber Security Home Lab

- Built a virtualized cybersecurity home lab in VirtualBox using Kali Linux, Metasploitable 2 and 3, Ubuntu Server, and Windows environments to simulate real-world testing scenarios.
- Performed traffic monitoring and vulnerability scanning using Wireshark, Nmap, and OpenVAS.

Multi-Router Campus Network Design with VLANs, VLSM & RIP Routing

- Designed a multi-building network using VLANs, VLSM, and RIP routing.
- Implemented inter-VLAN routing (router-on-a-stick) with 802.1Q trunking.
- Configured and verified dynamic routing and network resilience.

VLSM Subnetting and Multi-LAN Network Design with RIP v2

- Designed a scalable IP addressing scheme using VLSM subnetting.
- Implemented RIP v2 for dynamic routing between multiple LANs.

Static & RIP Routing and VLSM Implementation

- Built a multi-router topology with multiple LANs to simulate real-world network environments.
- Configured static routes for manual path control and RIP v2 for dynamic routing.

EDUCATION

Bachelor of Computer Science and Engineering

International University of Business Agriculture and Technology

09/2022 - Present

CGPA

3.79 / 4.0

Higher Secondary School Certificate

Uttara Model College

2019 - 2021

GPA

4.92 / 5.0

Secondary School Certificate

Shahid Academic School

2017 - 2019

GPA

4.57 / 5.0

COURSES

Networking Basics

Cisco

Linux 100: Fundamentals

TCM Security

Introduction to Network Analysis

Security Blue Team

Advanced Cybersecurity Training

Business Automation Ltd.

ACADEMIC & PROJECT ACHIEVEMENT

Successfully Configured Inter-VLAN Routing

Achieved full communication across multiple VLANs using 802.1Q trunking and router-on-a-stick in a simulated campus environment.

Identified and Analyzed Real Network Traffic

Captured and interpreted live packets using Wireshark and Nmap during vulnerability scanning exercises in a home lab setup.

Implemented Scalable IP Addressing from Scratch

Designed a VLSM-based addressing scheme that efficiently allocated subnets across a multi-building network topology.

Maintained a 3.79 GPA While Doing Hands-On Lab Work

Balanced strong academic performance alongside practical networking and cybersecurity projects throughout the degree.

SKILLS

Networking

TCP/IP, IP Addressing, Subnetting (VLSM), Routing, Switching, VLAN Configuration and Inter-VLAN Routing (802.1Q), Network Troubleshooting

Tools

Wireshark, Nmap, Cisco Packet Tracer

Systems

Linux (Kali & Ubuntu), Windows

Security

Basic Vulnerability Assessment, Traffic Analysis
